

This list contains the vertebrate taxa known by the Saskatchewan Conservation Data Centre (SKCDC) to occur within Saskatchewan, as of the date provided above. If you notice any errors or omissions, please contact SKCDC.data@gov.sk.ca.

For more information about how the SKCDC generates these lists and what determines when a species is tracked by the SKCDC, visit: <http://biodiversity.sk.ca/lists.htm>

Conservation ranks/status are provided for each species. For details on each, refer to the following resources:

- Subnational (S), National (N) and Global (G) Ranks: www.biodiversity.sk.ca/ranking.htm
- Government of Saskatchewan Wild Species at Risk Regulations: <https://publications.saskatchewan.ca/#/products/1609>
- COSEWIC: <https://www.cosewic.ca/index.php>
- SARA; Government of Canada Species at Risk public registry:
<https://www.canada.ca/en/environment-climate-change/services/species-risk-public-registry.html>

SYNONYMS: This list is being provided by the SKCDC as a tool to facilitate users in determining the current, accepted taxonomy. If a name is currently out of use in Saskatchewan, its current synonym is provided, indented in the line below the accepted name. In this row, we are unable to distinguish between true synonyms and misapplied names used as synonyms. For example, *Cryptantha fendleri* is an accepted name for a vascular plant that is currently found in Saskatchewan. This name, however, has also been misapplied to both *Cryptantha kelseyana* and *Cryptantha minima* in the past. Therefore, it appears as a synonym to those two species. In addition, there may be more than one current name for any given out-of-date name (e.g., *Cryptantha nubigena*) if a species had been split, or if a name was misapplied to more than one species in the past.

It is up to the user to ensure that the taxon name they choose is the correct one for what they have observed.

Taxa List: Vertebrates
